The Disease Appears in Pennsylvania

Disastrous Conflagration at New Orleans. Immense Buildings in the Heart of

the City Burned. The Loss Will Aggregate About Two Million Dollars.

The Heat Wasso Intense That the Firen Were Held at Bay Till Several Large Structures Had
Collapsed.

By Telegraph to The Times.

NEW ORLEANS, Feb. 17.—[By the Assoclated Press. | At 11 o'clock tonight fire gutted the dry goods store of Asharz & Sons, at the corner of Canal and Bourbon streets. The heat was so great that the firemen could not get near the building. The fire then spread to the adjoining buildings, and soon Werlein's music store, Cluvier's drug store, Runkel's dry goods, McClosky's confectionery, Kuhn's fancy goods, Kreger's fancy goods, the Nickel Plate shoe store, Quibble's fancy goods, Kraus Bros.' notions, Hoffman's worsteds, Brill's saloon and Wenger's saloon were consumed. The fire is still burning. The buildings and stock destroyed will

approximate \$2,000,000. Schwartz's establishment was a com manding structure, only recently completed, being four stories high with a mansard roof of brick, iron and stone, surmounted by a high clock tower. At surmounted by a high clock tower. At 10:15 a waster in the restaurant on the opposite side of the street perceived a small tongue of flame licking its way along the cornice of the Schwartz building and hastened to give an alarm. The department responded promptly, but experienced great difficulty in getting to work and the whole edifice was ablaze before a stream could be brought to hear upon it. The flames be brought to bear upon it. The flames spread backward to Kraus Bros.' estab-lishment and across Bourbon street to Cluvier's drug store simultaneously, and the department found itself powerless to cope with the destroyer and subur-ban engines were pressed into the ser-

To the left it attacked Werlein's and crash followed upon crash as the roofs fell and the overburdened floors beneath, already heavily laden with stocks of merchandise, each gave way in turn until the interior fixtures of the stores and their contents were piled in a blazing heap on the ground floor. Stripped of all support the walls of the Schwartz building toppled and fell and the Werlein building quickly followed suit. The building on the river side of Bourbon street crashed in soon after, and full half a square of the soon after, and full half a square of the most valuable property in the city was a smoking mass of ruins.

a smoking mass of ruins.

A breeze arose to fan the flames and they attacked their prey with renewed vigor. On the opposite side of Bourbon street Cluvier's building was the first to collapse and carried with it the walls of Runkel's establishment. McCloskey's confectionery was a mass of seething flame and Kreger's building was also burning flercely. The Nickel Plate shoestore intervened to save the main entrance to D. H. The Bourbon street entrance to Holmes's store, however, fared worse. The massive plate glass windows and weather doors were shattered to atoms and the more were shattered to atoms and the mor were shattered to atoms and the more inflammable portions of the stock thus exposed caught fire in a moment. Long ere this the department was fairly at work and tons of water were being poured upon the burning material, and the flames showed the first symptoms of yielding. On Canal street east of yielding. On Canal street east of Bourbon they met an impassable barrier in the massive buildings which adjoin Werlein's, and though the roofs of all stores comprising the row were more than once after the flames could make no progress against the sturdy masonry. Schwartz's stock, valued at over \$500,000, was insured for \$360,000, and the building for \$35.000, considerably below its value.

Holmes's stock was insured for \$500,000 and worth nearly twice as much, but the damage to it is thought to be very great.
Cluvier carried \$8000 insurance on

stock, and others were insured in pro portion. Every insurance company in the city has about an equal share of the loss. Most of the buildings destroyed were newly erected, and collectively are thought to be worth \$250,000. Many

other buildings with contents are badly damaged. It is impossible to obtain full details of the losses and insurance

WINGATE (N. M.,) Feb. 17.-[Special.] At a meeting of cattlemen held at Coolidge, N. M., a report was made to the military authorities stating what the cattlemen believed to be their side the trouble between the Navajos and cowboys, which resulted in the late excitement near Chavez station, when the Indians, heavily armed and mounted. threatened the lives of all the settlers in the country. There were present many representative cattlemen, and in their statement it was shown that cattle stealing by the Navajo Indians had been going on four or five years, and that the cattlemen had been unable to obtain any redress or a legal and peaceable settlement, although many efforts had been made. A number of cattle-men went to the chief, Mariano, and asked his assistance, and he notified the Indians to leave the cattle ranges, and authorized the cowboys to compel them to stay away.

Conrad, Henry Dorsett, William Crane, the pioneer cattlemen of this section; Coddington Bros., whose ranch was threatened by the Navajos last week, and other foremen cowboys, and statements were made by all present showing where, at different, times, carcasses found with the meat and hides taken, and pony tracks leading toward an Indian camp until obliterated by sheep being driven over the tracks. Nearly all present had caught Indians driving cattle, which, when discovered, they would leave.

The cowboys testified to having exchanged shots with Indians driving cattle, and finding meat and hides in their camps. The authorities were earnestly asked to afford some redress to the cattlemen, and it is hoped some means may be found to stop this wholesale slaughter, but it is believed that no other way exists than to make the Inis a very large one; as while allowed to roam at large along the railroad they are brought under the worst of influences, and they can procure whisky, for which they will prostitute their women and sell their last blanket.

It is believed that should the authoriities take no action the cattlemen will try to do what they can to protect their property from thieving redskins, as would only be carrying out the vative counsel patience until the author ities act, but should other assistance be withheld it is feared that the end is

Other Foreign News-Election Riots Con tinue in Japan—Balfour Thinks the Gladstonians are Demoralized -Storms in Europe.

Berlin, Feb. 17.—[By Cable and Asso ciated Press. | Eugene Wolff, the news-paper correspondent whose reports to the Taablatt on the disaster to the Zelew ski expedition and other matters caused Chancellor Caprivi to order his expulsion from German East Africa in November last, has published an amplified attack upon Baron Soden's administration of the governorship of the East

African colony. Wolff declares that no report of the actual losses in the last two fights with natives was ever published nor, he adds, was the fact announced that an English caravan was plundered. Wolff says that all officers of experience in East Africa were either dismissed or have resigned in disgust, and the Soden régime is bound to end in disaster. Wolff's article will form the subject of

an interpellation in the Reichstag.

Dr. Marselle, medical adviser of the Sultan of Zanzibar, gave two years ago the details with regard to the causes of the trouble in Africa. He said the attempts at plantations made by the German company in the vast territory ceded by the Sultan were never serious. Further, the Germans led at Zanzibar a harmical life and the greater part of luxurious life, and the greater part of the money was spent in champagne. For the administration of this territory they engaged to pay the Sultan the annual sum of 80,000 rupees, but the chief object was receiv-ing customs duties. The convention ing customs duties. The convention came into operation on the 14th of August, and within two months from that date the German civilizers had spoiled everything. The Germans behaved with extreme brutality and for the merest trifles shot down the natives with revolvers. The protests of the natives were met by acts of violence. At Pengani the Sultan's flagstaff was burned. A rising ensued, and for its suppression the Germans, joining irony with insult, compelled the Sultan to send his own troops under pretense that it pertained to him as sovereign of the country to insure peace. country to insure peace.

A MIGHTY ICE GORGE. Towns in Pennsylvania Liable to be fnun-dated. PITTS BURGH (Pa.,) Feb. 17.—[By the Associated Press.] The ice gorge at Parker is still intact and the greatest alarm prevails. Efforts to blow it up with dynamite were fruitless. Superin tendent Price, of the river division of

the Allegheny Valley Railroad, says it is the worst gorge he has seen since 1874. The river bed is apparently packed solid with layers of ice for nearly twenty miles. At Goose bar the ice is piled nineteen feet high for the better part of eight miles. From Hill View bend there is an open channel for about a mile, where another gorge be-gins and extends to the mouth of Clarion River above Parker. There is fear that the gorge will form such a solid mass as to shut off the water channel altogether. If it does Parker and other towns along the river will be sub-merged. A few hours of warm rain now would do tremendous damage at Parker and Brady.

By Telegraph to The Times. PHILADELPHIA, Feb. 17 .- [By the Ass sociated Press.] An address will be is sued tomorrow by the Executive Committee of the Pennsylvania Republican Association, an organization whose object is to prevent Quay's reëlection to the United States Senate. The ad-

dress substantially opposes him "because he has forced unpopular nominations and platforms which brought defeat to the party; because he has insti-gated or countenanced the defeat of the party's candidates to achieve some personal end; because he aided in defeat ing legislation to secure a free ballot and fair count in the South, to the enactment of which the Republican party was pledged; because he has by and actions discredited the pl pledged policy of his party in behalf of genuine, efficient and business-like reform of the civil service, and compelled office-hold-ers to devote their time and money to political work in his behaif; because of his attempts to embarrass the present administration is due to the fact that federal offices in this State were not placed entirely at his dis-posal; because he repeatedly opposed the nomination of James G. Blaine for the Presidency when the overwhelming sentiment of Republican voters of the State was favorable to Blaine's selec-tion; because so long as he dared, he opposed every change of party rules calculated to increase the power of voters; because he had primaries and conventions called long before there was any necessity of so doing in order was any necessity of so doing in order to forestall the growing sentiment against him; because he insisted that no recognition be accorded any element of the party not willing to act with, or be subservient to him; because we be-

lleve that Republican voters have a right to choose their United States Sen-ators instead of their being selected by office-holders without regard to characoffice-holders without regard to character, ability or fitness."

The purpose of the organization is declared to carry on the contest strictly within the party lines and secure the election of a majority of Republican members of the next Legislature who will oppose the reelection of Quay.

LOUISIANA POLITICS.

ominations Made by the Warmouth Fac-tion—Democratic Dissensions. New Orleans, Feb. 17.—[By the Associated Press.] The State convention

of the Warmouth faction of the Republican party of Louisiana met today. The platform reaffirms faith in the principles and policies of the party; is satisfied with the achievements of the party in the last four years, including the McKinley bill; condemns the Demo cratic State administration; congratu-lates the people on the overthrow of the lottery, crediting the Republican party with the good work. It condemns the majority of the Republican State Central Committee for attempting to control the party, repudiating the "boodle" convention held under their auspices and asserting that the convention dominated by lottery money. It demns the slaughter of Italians at parish prison, and in conclusion, in a lengthy resolution, indorses Harrison's administration and favors his nomina-

administration and favors his nomina-tion for a second term.

The following nominations were made: Governor, John E. Beaux; Lieutenant-Governor, James D. Weaks; Attorney-General, James M. Edwards; Auditor, Stephen R. Gay; Treasurer, James Lewis; Secretary of State, John E. Starr: Superintendent of Education Edward W. Barnett. Lewis and Stars

The Foster faction of the Louisiana Democracy today submitted to their opponents a counter proposition of compromise. Among the salient points are: That two committees agree upon as single ticket by naming candidates for Governor and Attorney-General, one committee to name the candidates for Lieutenant-Governor and Auditor three Alliance candidates of the other faction to retain their respective posi-tions, all ballots to be printed and voted against the lottery amendment, and legislative nominees to be in-structed against the lottery; the State Central and Executive committees to be reconstructed, said committees to adopt suitable means to harmonize party dif

ferences, etc.

The McEnery committee tonight de-clined the counter proposition, and both committees adjourned until tomor

Simpson Will Face the Music. St. Louis, Feb. 17.—The Republic's Hot Springs, Ark., special says that Col. Simpson of Dallas, Tex., whose name was coupled with the recent finan cial sensation there, is in Hot Springs, When seen today he pronounced the story of his alleged crooked dealings false; denied all knowledge of reported indictments and said he would start for Dallas at once.

Another Indictment Against Young Field New York, Feb. 17.—Another in dictment was filed against Edward M. Field today, charging forgery in second degree, the indictment be predicated on an alleged forged bill

NEW AND VALUABLE DISCOVERY—
A Big money in it for any one who secures the right to use it; a process by which ordinary dairy butter can be increased in weight one-half, by adding pure, sweet milk; for instance, you take 100 pounds of butter, at a cost of 75 cents; other ingredients, 1 cent to the pound, 50 cents; you have a total outlay of \$31.25; from this you make 150 pounds of choice butter, at 30 cents per pound, \$45; you have a net profit of \$13.75 out of an investment of \$31.25, making almost 50 per cent. In a single transaction; this new discovery is a fortune to any one who secures the right to manufacture it; it is no butterine or from every element of butter itself; no ingredient in it but purely wholesome food, and its keeping qualities are equal to any butter that can be made; there is no danger of over-production, as fully one-half of the butter consumed on this coast is imported here from the East—if you were to add 50 per cent. to all the product of this coast you could not then supply the demand; State and county rights for sale; persons who wish to engage in the business in this State can secure an interest with the owner, and will have full charge of the business, in his allotted territory; this will bear the strictest investigation of the column for the supply the demand; State can secure an interest with the owner, and will have full charge of the business, in his allotted territory; this will bear the strictest investigation of the column for the supply the demand; calm. INSTANTLY KILLED. Fatal Accident at the San Fernando Street Depot.

Charles H. Curl, Locomotive Fireman, Meets with a Sudden and Horrible Death-Knocked from the Cab and Run Over.

Charles H. Curl, a locomotive fire man in the Southern Pacific yards at the San Fernando street depot, met with a sudden and horrible death at an

early hour yesterday morning.

Curl, who is about 20 years of age, was standing on the footboard of a switch engine under the control of struck him in the back as the engine slowly backed toward the main track, and without any warning the poor fel-low was thrown between the cab and the tender. The engineer saw the acci-dent immediately, and reversed as quick as possible, but not until the driving wheels had passed over Curl's

body.

Curl was standing with his back to
the switch bar, or he would have seen
it in time to get out of the way, as the

it in time to get out of the way, as the engine was moving at a very slow rate of speed.

When picked up the young man was dead, and it is safe to say that he never knew what hurt him. One of the driving wheels passed over his chest and almost severed the body, and his right hand was cut off.

almost severed the body, and his right hand was cut off.
His body was taken to Peck & Neitzke's undertaking rooms before Coroner Weldon was notified, but was afterward removed to Garrett & Samson's, where an inquest was held at 2 o'clock in the afternoon. The engineer and several witnesses were sworn, and the jury found that the young man's death was purely accidental.
He has lived in this city several years, was single, and has two brothers here, one of whom is a Southern Pacific engineer.

engineer. THE FIGHT TONIGHT.

The Prospect for a Battling Mill Very Favorable. The light-weight contest between James Lawson, the colored ex-champion of Australia, and Jimmy Conley, a clever Bostonian, which takes place this evening in the gymnasium of the popular Pastime Club, will doubtless be witnesses the contest of that few properties of the contest of the contes restime Club, will doubtless be witnessed by every member of that flourishing organization and many of their friends, for, if all that is said of Conley's prowess be true, the event should prove to be the most interesting puglistic event ever held in this city. The fact that Lawson has won ninety-five battles and beaten some of the best men in his class is sufficient guarantee of his ability to hold his own with all comers, and for the reason that he has had so much more experience than his opponent he should have little difficulty in carrying off the palm. On the other hand it must be conceded that as Conley is clever and a hard hitter, and is very ambitious to climb the ladder of fame, he will undoubtedly make things interesting for his dusky autagonist unless he proves to be entirely outclassed. The winner of this battle will be matched with Billy Maber, the Australian wonder, who is at present wintering here.

The best authorities in Southern California commend these lands for the raising of Lemons. One syndicate is arranging to plant 1000 acres in Oranges and Lemons, one-half each.

Aside from its wonderful advantages as a fruit-producing colony, South Riverside is an important manufacturing point. The Pacific Clay Manufacturing Company's vitrified sewer and water-pipe works the largest on this coast—are located here. Also the Porphyry Paving Company, the Standard Fertilizing Company, and two pottery works. This is the shipping point for the famous Temescal tin mine plant. A company is now being formed to work on a large scale the finest cement rock found in the United States. This latter company will probably employ 200 or more men. The material is at hand for additional manufactories

Another Heavy Damage Suit Against the Southern Pacific.

Citizen Who Thinks He Has Been Dam aged to the Extent of \$30.000—The Samonset Case-Court Notes-

The case of J. T. Richey vs. J. G. Mc-Michael, an action arising out of an alleged fraudulent land transaction, came on for trial before Judge Wade in Department Three yesterday, and at the close of the testimony for the plaintiff was submitted, with a motion for a nonsuit, and by the Court taken under ad-

visement. visement.

Plaintiff, who is proprietor of the
Fifth Avenue Hotel at Louisville, Ky.,
alleged that the defendant, an old friend of his, wrote to him in 1888 and told him that he had an opportunity to purchase from S. T. Buell his one-third interest in 165 lots in the Fountain addition to the town of Fairview, which he described as being situated within five miles of Santa Ana and two and a half miles from the sea. He further wrote an efflorescent pen-picture of the beauties of the place, adding that a natural gas well had been discovered there, and that a motor line ran through the place to the beach. Buell's interest in this land, he wrote, could be purchased for \$2750, payable one-third cash, one-third in six months and one-third in twelve months. Accordingly plaintiff, on May 9, 1888, paid the sum of \$916.66 to defendant, being one-third of the sum mentioned, relying upon the latter's representations, and McMichael subsequently claimed that he had bought Buell out, paying half the amount down. Plaintiff afterwards learned, however, that defendant never acquired title to the property at all, but that Mrs. M. E. Canine had purchased Buell's interest for \$1875. Thereupon he sought to recover the sum of \$916.66 and \$1000 damages. the place to the beach. Buell's interest he sought to recover the sum of \$916.66 and \$1000 damages. The defendant, in his answer, denied

the allegations of plaintiff's complaint and claimed that the matter was barred by the statute of limitations.

ANOTHER HEAVY DAMAGE SUIT. Another heavy damage suit was comnenced in the Superior Court vesterday against the Southern Pacific Company by one of its passengers, who had been expelled from a northbound train by its employés, and, from all appearances, the latter have overstepped the bounds of prudence and allowed their ambition to "overleap itself."

The plaintiff in this action is F. P. Yeager, a well-known citizen of Pueblo, Colo., who alleges in his complaint that on December 15, last, he purchased a first-class ticket to San Francisco and nrst-class ticket to San Francisco and return, entitling him to travel over the Atchison, Topeka and Santa Fé road to Albuquerque, N. M., thence to Barstow over the Atlantic and Pacific road, thence over Southern California road to this city, and hence to San Francisco over the Southern Pacific road, and return, no to and including June 14 turn, up to and including June 14, 1893. In due course he arrived in this city, and on Tuesday, February 9, last, he boarded train No. 18 at 1:50 o'clock he boarded train No. 18 at 1:50 o'clock p.m. with the intention of going to San Francisco. Before reaching Tropico, Conductor George H. Odell examined plaintiff's ticket and, after punching it, placed a punched check in the passenger's hat and passed on. A few minutes later Train Agent James N. Dowling entered the car, and, after changing his soft felt hat for a conductor's cap, he approached plaintiff and asked to see his ticket. Plaintiff immediately produced it, and Dowling proceeded to cross-examine him as to where he got it, how much he paid for it, etc., to all of which interrogatories Yeager replied as above stated. Dowling then requested plaintiff to sign his name on a tablet, which he did, whereupon Dowling said, insultingly: "I will tell you, my friend, this ticket was bought in Los Angeles; my advice to you is to go back to Los Angeles; and get your money Music! Music! Music! Angeles; my advice to you is to go back to Los Angeles and get your money Music! has been sold you the ticket." Plainting naturally indignantly denied the imputation, but Dowling sarcastically remarked that he knew all about it, and when the train stopped, again requested him to sign his name. After further comparison of this signature with that on the ticket, Dowling tore off the coupons entitling him to his passage from Los Angeles to San Francisco and return, and saying rudely, "Pay your fare," walked off. At West Glendale Dowling returned and said to plaintiff: "You might as well pay your fare or get off, and the sooner you do it the less if will cost you." Yeager of course refused to do either, and reiterated the statement that he had already paid his fare. He further demanded of Dowling his reasons for asserting that he had bought his ticket in Los Angeles, to which the agent responded that he knew it because he did not answer to the description on the ticket. Plaintiff endeavthis signature with that on the ticket,

tion on the ticket. Plaintiff endeavtion on the ticket. Plaintiff endeavored to explain that he had had his beard trimmed at Los Angeles, but defendant laughed rudely, and, at Pacoima, Dowling, Odell and a brakeman came up to where the plaintiff sat, and the conductor, touching him on the shoulder, said: "This is your station. Get off," and pulling him out into the alse, ejected him from the car. The train then went on leaving him in the stathen went on, leaving him in the sta-tion, the office of which was locked up, and the hotel closed, twenty miles from anywhere. For this outrage he seeks to recover damages in the sum of \$30,-

Ir the Louisiana lottery is to be removed to Mexico, as announced, it will be a good riddance of a very dangerous and demoralizing institution. Of course it will expect to draw a large share of its patronage from the United States, as at present, but a rigid enforcement of anti-lottery regulations by the Postoffice Department is certain to restrict this business. As to Mexico and the Mexicans, if they choose to fool away deir money on the big bunco game it is none of our affair.

THE London Lancet has performed a feat worthy of an enterprising daily by obtaining specimens of Russian relief bread and having them analyzed. About 10 per cent. of foreign substances was found mixed with the rye flour, the adulterants being woody fiber husks, leaves, seeds, silica and sand. The samples were dirty brown in color and would not be recognized as bread by an Englishman or American. The relief allowance is less than a pound a day to each person. According to a Russian account some of the so-called bread is made wholly of wild arrack, potatoes, chaff and leaves. No sympathy will be wasted on those guilty of this horrible cheating if the Czar takes them in hand. Unfortunately, however, dishonesty is not punished in the Russian empire with anything like the rigor -meted out to supposed treason.

Printed and written accounts confirm the Printed and written accounts confirm the deep impression caused on all Spanish and Portuguese-speaking republics by the action of the United States Government against Chile. They regard it as an outrage, and declare that the illusions they have hitherto held respecting the great Northern Republic have vanished. The legitimate influence of the United States has been destroyed and in future the Central and South American republics must look for protection and mutuality of interest, both commercial and political, only among themselves.

The wish is probably father to the thought with the jealous English correspondent. The fact is that other South American peoples are probably pleased to see Chile, which has lorded it over them more or less hitherto, brought to book by a strong, self-respecting power. The United States is held in higher estimation today by all of the South American nations, including Chile, than ever before, and respect is the best possible forerunner of amity. The United States will do fairly well with its relations with South America if our British well-wishers will only restrain themselves from unnecessary worry.

THE Louisiana Democrats who are arming themselves with Winchester rifles to try conclusions before or at the next State election present a humiliating spectacle for Americans to contem Such a procedure shows that there is a section of the United States which is not fitted to enjoy or capable of maintaining popular government. If an actual outbreak should occur in Louisiana it is urged that the General Government would be authorized in onstruing it into insurrection and might proceed to declare the State un der martial law. The situation in Tennessee, where the rioting coal miners recently terrorized the authorities and liberated all of the prisoners in the penitentiary, is not much better. It is pretty evident that the "shotgun policy" which has obtained for years in these States, virtually disfranchising the colored citizens, has so demoralized public sentiment that pacific methods of overnment controlled by the majority have lost their prestige. It is simply a weakness on the part of the United States Government that such wrongs should be tolerated so long. Like othe evils that are temporized with, they will radical remedy becomes imperative.

THERE is a decided reaction setting in against the use of French terms in the bills-of-fare of American banquets. The Kansas City Bar Association, which is making preparations for a big din-ner, recently voted instructions to the steward to "discard all French terms and call a spade a spade." The Kansas City Star says that this step was precipitated by a recollection of the fast bar banquet, at which, in spite of their excellent appetites, some of the most distinguished members of the bar were in danger of being thrown out of court altogether and were much humillated by their ignorance of what appeared to be the commonest rules of practice. On the other hand gentlen who were content to drift along and trust to luck often found themselves confronted by the most unpalatable orsels when it was too late to file a demurrer. To issue a writ of habeas corpus and find that the corpus was a re meatless wing or a kidney or a bit of liver smothered in French was a disintment that amounted to positive iscomfort. To order vin ordinaire and ver that it was neither Pommery nor ole was vexation of spirit. The ement for a wholesome substitution United States" in place of the semicless and often badly-spelled or used French terms is a sort of pericanism that is bound to grow in perication that is sound to give as much opular favor. There is just as much adanty and snobblahness in writing a lil-of-fare in a foreign language as in apparing an English article or an English and more finished, both in emotional and manual ability, and now presents to her hearers a well-rounded whole that fully supports her growing eminence as an artist among other artists, among other artists.

#### MISSIONARY CONFERENCE.

Large Attendance of Delegates from Al Parts of Southern California-A Number of Interesting Addresses

The missionary conference held under the auspices of the American Baptist ssionary Union opened last evening at the First Baptist Church, there be ing a large attendance of delegates from all parts of Southern California as well as a large representation from the

congregations of this city.

The platform and pulpit were handdecorated, some of the floral designs being quite elaborate.

Dr. Frost opened the meeting with prayer, being followed by Rev. J. Sunderland of Oakland, district secretary of the union, who spoke briefly, advo-cating a complete and thorough consecration on the part of the churches as a necessary precedent to success in any kind of missionary work. Rev. Dr. Reed in his address of wel-

come gave expression to the high sense of gratification which filled his heart and the hearts of his church people at being privileged to thus entertain so many visitors from other churches of the denomination. He dwelt on the importance of the missionary work at the present time, stating that there were now more than 1,000,000,000 were now more than 1,000,000,000 of unevangelized heathen in the world as against a total of 800,000,000 reported a few years ago. He gave statistics showing the rapid advance made in foreign fields and the comparatively small progress made at home, adding, "We must now confess with praise to God and shame to ourselves that the "We must now confess with praise to God and shame to ourselves that the foreign work is by far the most success-

Speaking of the needs of the heathen he said: "Their condition is as much worse than ours as despair is worse than hope—as condemnation is worse than absolute salvation." A peculiar feature of the work was, he said its immediate influence on immediate influence on immediate influence on important cur-rent events. He quoted the words of Christ, that "this gospel must be preached to all the world and then the end shall come." The speaker endeav-ored to emphasize this latter promise, imploring his hearers to so live and work that when the kingdom shall come as little as may be shall remain undone.

Rev. W. H. Pendleton, D.D., of East Los Angeles was the next speaker and prefaced air remarks by asserting that no religiously-performed duty can bring a human being so completely in touch with the Divine Spirit as does the work of foreign missions. There is a large of foreign missions. There is a large class of people who are ready and glad to support missions at home, but have no room in their hearts for the workers among the heathen abroad. Even Simon Peter, the great apostle evangelist, was so loath to perform this branch of work that a vision direct from God was necessary in order to induce him to start. Jesus said. "Go ye unto all mations"—that was His will and His spirit must actuate us if we would carr out His great commission. It is the King's business and it requires of us haste. It requires haste because the not know, but he will probably not allotted time for its accomplishment is very brief and rapidly drawing to a

What they need is not so much the doctrine as an exemplification of it. People often speak of some of our clergy as walking encyclopedias, but what they need is to be walking lifeles."

Continuing he said, "The heathen world is waiting even now for the reincarnation of Jesus Christ." Several illustrations and anecdotes were then

given to prove this statement, which the speaker remarked often shocked many students of profound orthodoxy. The prayer of such conferences as this

The prayer of such conferences as this is that there may be more missionaries, sufficiently endewed with Christian spirit, to show these wondering strangers that there is a reality in this religion of Christianity.

A Quietus on the Scheme to Acquire Part of Mexico.

Heard in the House—Sympathy with Russian Hebrews—Other News from Washington,

By Telegraph to The Times. WASHINGTON, Feb. 17 .- [By the Associated Press.] The silver question was broached again this morning, and this time it was in the hearing before the House Committee on Agriculture on the Anti-options Bill, which has been under

discussion by the committee for the past two weeks. Charles A. Pillsbury, the Minneapolis miller, was on the stand. He stated in the course of his remarks that the world's surplus supply of wheat was steadlly dwindling and being drawn on each year to meet the increasing consumption of wheat. He crop of the United States this year i would have been possible to get \$1.50 a bushel for it from Europe just as easy as 90 cents, because Europe had to have it. Pillsbury. More nominal dollars but perhaps they could not buy so much.

In reply to further questions from
Lewis, Pillsbury admitted that short
selling alone would not account for the
decline in wheat, which was, too great to be chargeable to one cause alone.

In his address to the committee Pills-bury advocated the passage of the Anti-options Bill. He said there should have been high prices for wheat this year, but, partly in consequence of short sell-ing, millers and others were living from hand to mouth. The world was drawing on the surplus supply of wheat each year, for consumption was steadily in-

reasing.
The sub-committee of the Senate Ju diciary Committee today heard further argument upon the pending Washburn Anti-options Bill. Alfrea Romer, of the New York Produce Exchange, and Thomas A. Wright, of the Chicago Board of Trade, and William Cudahy, the Chi cago pork packer, argued in apposition to the bill.

#### THE UTAH OUESTION.

Opponents of the Home Rule Plan Hav Washington, Feb. 17.—[By the Asso ciated Press.] The House Committee on Territories gave a hearing this morning to opponents of the proposed legistion to give local government to Territories as proposed in the bill intro-duced by Mr. Caine, delegate from Utah Territory. The committee was ad-dressed by O. W. Powers, representing

the Liberal party of Utah That party, Powers said, was com-posed of Democrats and Republicans who for the time being had cast aside their national political preferences and had joined hands for the purpose of building up an American State in the mountains. It was because the Mormon people were honest and sincere that the Liberal

party opposed the measure, the time not having come, in its opinion, for it. Much of Powers' argument was in refutation of several statements made on the other side of the question by H. W. Smith before the committee last W. Smith before the committee last week. He read to the committee a letter from M. A. Breeden, an attorney of Ogden city, stating that Smith told him before leaving for Washington that "Statehood in Utah would be a great calamity: if the come a law no Gentile could live in the Territory; that he had no faith in the Mormon people; that they were simply deceiving the people to gain power, and as soon as the conditions were changed the brethren would have another revelation, reëstablish polyg-amy and drive Americans out of the

Territory." The statements made in the letter were denounced by Smith as a lie. He denied having been in Ogden before coming to Washington or having any conversation with Breeden. In refutation of statements made by Smith, call-ing in question the honor and probity of United States Judge Miner of Utah, Mr. Powers read numerous telegrams from influential people denouncing as false all the charges and imputations against the moral and judicial integrity of the judge.

House.—Immediately after the introduction of bills and resolutions this morning the House went into committee of the whole on the Indian Appropria-tion Bill. There was a dispute imme-diately over the limitation to be placed on the general debate. Mr. Peel of Arkansas and Mr. Wilson of Washing Arkansas and Mr. Wilson of Washington, representing the majority and minority of the Committee on Indian Affairs, favored restricting it to the smallest possible compass, but the People's party, speaking through Messrs. Watson and Simpson, insisted on the right to debate the measure, and the discussion began without any limitation being ordered.

He protested against taking money out of the pockets of his people to pay for boarding schools for Indians. They were as able to work as the people he represented. Colored people work day after day to furnish money appropriated for Indians, yet the United States refused to give the colored people a dollar for education. He did not think schools had a civilizing influence upon the Indians.

the Indians.

Mr. Watson of Georgia took advantage of the latitude of the debate to refer to the agricultural and other inter-ests of the country. He argued that prices of the products of the farmer had been greatly decreased, owing to the financial laws now in force. He argued against class legislation, which was the ruin of the country. He said that according to the report of the Superintendent of the Census every man woman and child was entitled to \$10,-000. but under the law money had been dumped into the hands of those who had special privileges. For the last twenty-five years national banks had had the people's money for 1 percent., and been making their money by lendand been making their money by lending it to the people to whom it belonged at between 8 and 30 per cent. Bankers, manufacturers and railroads had asked Congress for donations; farmers had asked nothing.

Mr. Watson was frequently interrupted by Mr. Funston of Kansas, whom he dubbed Farmer Funston, and the coloury between the two gentlemen cre-

loquy between the two gentlemen created great merriment throughout the After further debate the com nittee rose and the House adjourned.

#### THE WOMEN OF LONDON.

Their Curse is Drink, Resorted to by All Here at a moment's glance you may see the distinctive curse of London's

oor, writes Lady Henry Somerset in the North American Review for Jannary. The women drink. Mothers. daughters, sisters, wives, grown women children of tender years-the ginshop is open to all, and all go to it. No-where in New York did I see or hear of women not utterly abandoned habituallg frequenting saloons. Nowhere in London is there a public house but the women will be as good (?) customers as the men. It is impossible to overrate the men. It is impossible to overrate the influence, the soul-destroying influence, this has had upon the homes of the poor, for it is by this, I am convinced, that the idea of right and wrong has come to be hopelessly confused where it is not absolutely lost. It is not uncommon to find a mother who, since marriage has been a faith ful wife, and perhaps before that a vir-tuous girl, looking on with indifference while her daughter "goes on the streets" and is lost in the unnumbered legion of victims hourly sacrificed to the demon of vice. She may regret the fact, as a mother in a wealthier station might regard her daughter marrying beneath her, but there is no shock, no natural horror, at the wanton marrying of God's fairest handiwork, a woman's soul. In our long worship of Mammon the shame of poverty and the shame of sin have got confused; to the poor in their misery the burden of disgrace is but a slight addition to the load they already carry.

The fact of the existence of such a society, with of the existence of such a society, with sufficient strength to threaten a boycott, had not been suspected, and so little was known that even leading spirits of the society were unidentified. An investigation proved that the president of the society was Levi Kidwell, while those prominent in the movement are County School Superintendent J. B. Gehr and R. T. Modrell, a builder and contractor. A salconkeeper member contractor. A saloon-keeper, member of the society, when interviewed stated that the society had 800 members and intended to force the Chinese out by means of a boycott, and they also ex-pect to be a power in politics. The general opinion is that the effort will not be successful.

Weather Generally Threatening with Rain SAN FRANCISCO, Feb. 17.-[By the As-

ociated Press] The weather conditions and general forecasts are as follows: General cloudiness and threatening conditions have characterized the weather in the past twenty-four hours throughout the section south of South-ern Oregon. There has been a light and general rainfall throughout North-ern California north of a line drawn from San Francisco to Sacramento, but no rains are reported from the more eastern portions of the southern sec-

Southern California, extending northward into Southwestern Nevada.
Threatening weather continues in nearly all districts. The temperature shows but slight changes in several districts except on the Lower California coast, where there was a fall of from 4° to 8°, with a rise of 6° in the eastern portion of that section. Rain is also reported at Napa, Healds-

Nevada Braves Give a Terribly Realistic Stake Dance. Carson (Nev.,) Feb. 17.- By the Asociated Press.] Nick of the Woods, a porder drama, was put on the stage last night oby local talent with genuine Washoe and Pah-Ute Indians in the stake dance. John Mack, as "Nick," was lashed to the stake and the braves, n complete regalia and war paint, strippen to the waist, commenced their song, accompanied by a brandishing of knives and tomahawks around the prisknives and tomahawks around the pris-oner. The audience was held spell-bound during the dance, and so much realism was seemingly thrown into the movements that timid ladies trembled as the apparently infuriated savag swooped their knives and hatchets the face of "Nick."

At the conclusion of the dance cheer after cheer went up from the spectators, and the curtain was repeatedly rung up. This is the first appearance of natives in Nevada, and the rear seats of the theater were packed with In-dians of both tribes.

Look out for Comets.

[English Exchange.]

Two of the known periodical comets should return to perihelion early this year, if the calculations are correct. Both have a period of about five and a half years, and were last observed during the summer of 1886. One is the comet first discovered by Mr. W. R. Brooks in 1886, and the other is that discovered by Pons in 1819, which was rediscovered and its period calculated by Prof. Winnecke in 1858. Its returns were observed in 1869, 1775 and 1886, but not in 1863 or 1880, when the positions were unfavorable. The comet was entered as Winnecke's, and was due last month, as in 1886 it passed perihelion twelve days earlier than the predicted time.

Five Hours Earlier.

[Santa Barbara Press.]

The Los Angeles Times on Sunday commenced to run a special delivery train ever the Santa Fé's "kite-shaped track," covering a distance of 148 miles and taking in many towns in Southern California. This gives many places the morning news five hours earlier than heretofore, a service that will no doubt be appreciated.

THE SOLDIERS' HOME.

Additional Buildings That are Badly Needed.

A Fine New Storage Reservoir Nearing Completion.

Large Sums That are Spent Annually in This County.

What is Being Grown-A Big Dinner Party Needed-More Appropriations to be Asked for

A committee of the Chamber of Com merce, consisting of Messrs. Wells, Forman and Hughes, went to the Soldiers' Home yesterday to confer with Gov. Treichel as to the best means of securing an adequate appropriation for the ensuing fiscal year and of furthering the interests of the Home in gen-eral. A. H. Denker and a representative of THE TIMES were also present.

A visit was first paid to the new storage reservoir and dam, which has been under construction for some months past, in the foothills about half a mile back of the Home. This is an immense piece of work and entails some neat en-gineering. The dam is 250 feet wide at the base and fifty feet at the top. The work is being conducted under the supervision of Col. Brown, who has had fifty years' experience in such under-takings, having had charge of much of fifty years' experience in such undertakings, having had charge of much of the work on the Eric Canal. When finished the capacity of the reservoir will be 150,000 gallons. A 12-inch pipe a mile long has been laid along the hills to the Home from a water tower at the reservoir. When completed, the supply will be ample for fire and irrigation purposes. The water is all brought from the head works, five miles away. Of the 600 acres of grounds at the home 200 are in barley, 150 will be in corn, about twenty are in fruit. The

nome 200 are in barley, 150 will be in corn, about twenty are in fruit. The land, which is equal to any in Southern California, and mostly frostless, should be more completely cultivated, and would be if appropriations sufficed. Vegetables are grown for summer use, and potatoes during a part of the year. The Government might advantageously conjuct an experiment station here for conduct an experiment station here for conduct an experiment station here for all kinds of semi-tropical trees and fruit, to the care of which the veterans could attend. All along the belt from Los Angeles to the Home lemons, oranges, peas and beans are flourishing, wherever planted. Peas are selling at 15 cents and beans at 35 cents a pound. All that is needed is water, which the Home will soon have. The veterans should have all the fruit they can be at the contract of the contra

Home will soon have. The veterans should have all the fruit they can eat. It would save doctors' bills, improve tempers and diminish complaints.

There are at present 741 inmates at the Home. Five barracks, a headquarters, mess hall, governor's quarters, laundry, surgeon's quarters, hospital, farmer's house and barn are completed or under construction. There is need for inder construction. There is need for five extra barracks, a boiler and engine house, a treasurer's quarters, an additional hospital wing, a permanent kitchen, an additional barn and corral and a payilion and bath-houses on the beach. When the buildings now under construction are finished a thousand men can be accommodated. There are over 10,000 old soldiers in

the country who are desirous of getting into a Home. Most of these would like to come to Santa Monica. The land is there and the healthiest location in the

there and the healthlest location in the United States. With a little effort it is believed that an appropriation sufficient to maintain a much larger number of veterans might be secured.

Few people realize the amount of money which is spent annually in the county by this institution. For the year ending June 30, 1891, the total appropriation was \$250,000, of which about half was for maintenance and about half was for maintenance and half for construction of new buildings. Besides that, the pensions amounted to \$66,346, all of which was spent here. The appropriation for the year ending

sum of \$202,061 was asked for new construction, of which nothing has yet been heard, but this is possibly owing to the fact that because of the abstraction of books and papers by a former treasurer (which have since been returned) Gov. Treichel was obliged to delay his estimate to the last moment and then forward it by telegraph.

An improvement that is badly needed is a system of electric lighting. At present kerosene is used, which is both dangerous and unhealthy. It is estimated that an electric lighting plant could be put in for \$25,000.

mated that an electric lighting plant could be put in for \$25,000.

The new temporary kitchen is clean, neat, airy and devoid of unpleasant odors. It would be pleasant if all restaurant kitchens were to be found in such good order. The range is as big as a small room, and the soup is labeled out of Brobdiguagian cauldrons. It is an interesting sight to see \$60 men take their seats at the table at once. Capt. A. M. Thornton, the treasurer, has supervision of the food supply and preparation, and appears to get along well with the old boys. Visitors are cordially welcome to inspect the institution. There is no star chamber business about the Home.

The new hospital, just finished, is very complete, with a separate kitchen, steam baths, elevator and other conveniences. could be put in for \$25,000.

An electric railroad from the Home would be a great convenience and would get about 150 passengers daily to start

with.

After a discussion it was agreed that it would be useless to attempt to do anything directly with Congress without lirst reaching the Board of Managers and getting their indorsement. Mr. Forman said that Senator Felton had expressed his anxiety to do everything cossible for the institution and Gov. Priechel stated that Senator Jones appeared to be particularly impressed with the need of an electric light plant. The Chamber of Commerce will be arged by the committee to take action to once in this matter,

Just beyond the Home the plowing of a 3000 acre tract by steam has been completed. What is needed along the foothills now is water for irrigation. A dozen Riverside lemon-growers have expressed their intention of buying land

in that section as soon as a water sys-tem is in operation.

Are still offering great inducements to settlers on the Alessandro tract OF 21,000 ACRES! Which lies only eight and one-half miles from Redlands on the east and the same distance from Riverside on the west. Ten thousand acres are already sold; 5000 acres are being improved. Between 300 and 400 families are living there today, with churchs, schools, stores and hotels. The Alessandro Tract of 21,000 acres is equal to 35 square miles, and is 12 miles long by 3 to 4 miles in width. A most magnificent valley. With the finest soil in the world for orange or fruit culture; with the best water right in Southern California. No stone or brush on the land. People wonder at the great success and rapid growth of Alessandro until they are driven over the tract, then they are not surprised, and all exclaim: "The half has not been told."

Nature has truly been lavish with her gifts at Alessandro in regard to climate and location, and we predict a much more rapid growth during the next two years than in the past year and a half of its existence.

A Musical Chain-gang. [Santa Ana Blade.]

A visitor to Los Angeles yesterday afternoon was standing on the corner of Broadway and First streets talking with a friend. The conversation was interrupted by a chorus of sixty odd voices singing "Home, Sweet Home." The singers turned out to be members of the chain-gang who were being driven to the jail from their work. No doubt the calabose is a home to a great doubt the calaboose is a home to a great many of the unfortunate fellows

Could any other city of its size under the Could any other city of its size under the sun furnish such a variety of sights, sounds, vehicles, etc., as this little cosmos in itself—Pasadena, "Gate of Eden," as some interpretit—on a sunny afternoon? From the writer's office window may be seen, side by side with a stylish six-in-hand, a forlorn "something" drawn by a superseen, side by side with a stylish six-in-hand, a forlorn "something" drawn by a super-annuated mule. Here dashes by a buck-board with prancing steeds and silver-trimmed harness, followed by a canvas-covered wagon like to the Eastern "coneatogas," drawn by four horses, heavily laden with cattle slain for the markets. A shout is heard, and behold a four-in-hand, with "Rochester" banners and filled with a gay party of excursionists from that city, "Rochester" banners and filled with a gay party of excursionists from that city, dashes by. Some have secured trophies of orange branches, nicely laden with the golden disks. Wagonloads of oranges and lemons, pony teams driven by merry children, surries, dog carts, etc., almost block the streets. There goes a party on horseback, one steed prancing to the strains of disjant music and performing such antics as would secure for him a prize in a tournament. Some boys, who in the East would be kept in the nursery, gallop by at full speed on their Indian ponies with two little maids trying to imitate their example, but sorrowfully following from afar. Here come some children mounted on burros, the riders' faces fairly beaming, for it is such fun to all children to be thus mounted. On the corner stand some native California.

A gentleman is just assisting some ladies to alight from a carriage and his courtly, grave and regular features, olive complexion and dusky eyes betray pure Castilian blood, In the street are some strolling Italians and the strains of "In Old Madrid" float upward from harp and violin. Across the way are a little lad and lassie in Highland rig, in charge of two French maids, who parles some schemently in discussing Mexican and Indian curios displayed in a window. Africa has been well represented by a minstrel company who have entertained the populace with good music to the special delight of a large crowd of boy followers. A little Eastern maid salutes a passer-by and calls his attention to a highly-prized treasure in the shape of a large indian basket filled with callas, violets and Japan lilles, lately given her by a kind friend, Some English friend bows from across the way, while on every hand some representative of the much-abused Celestial tribe may be seen.

As far as the eye can reach one sees suncrowned villas, and o cange groves, which dissolve at the horizon into a silver thread, which I know to be the waters of the great Pacific. After twilight has fallen the Holiness Band goes by singing, and later on, at the time of sending in this report, one hears the tread of the Salvation Army as it goes tramping by with drum and tambourine accompaniment.

ing to commit rape upon the person of Miss Clara Young came up before Judge Morton Tuesday night. The girl is a small, neat-looking creature about 20 years of age, carries herself well, and her employer, Mr. Phelan, holds her in high esteem. She Mr. Phelan, holds her in high esteem. She has only been out from the East a short while. She told her story substantially as follows: She was sitting by the edge of the water in the cañon watching the fish and Lehart tame to the opposite side and attracted her attention by throwing a pebble in the water. He ask her to come across, but as she could not on account of the water, he put a sapling across, upon which she walked over. He asked her if she had seen the falls further up the cañon. She had not and consented to accompany him. On the way back he attempted to rape her, but she screamed and hit him in the face with a piece of stone, whereupon he rewith a piece of stone, whereupon he rebut she screamed and hit him in the face with a piece of stone, whereupon he released her. She then ran to the house and told her story to Mrs. Phelan. Lehart attempted to make fun of the matter to the girl in the kitchen later, and Phelan drove him off. Phelan stated if he could have shot him. Lehart bears the marks of the rock on his forehead. He was held to appear in the Superior Court in bonds of \$2000, failing to give which he was taken to the county jall.

THE GREEN CASE.

The case of the People vs. Green progresses slowly. The attorney for the defense has taken "new tacties" in this case, gresses slowly. The attorney for the defense has taken "new tactles" in this case, and objects to every question put by the City Attorney on the ground that it is "incompetent, irrelevant, immaterial," which necessitates each question being written out, as well as the answer and the judge's decision, thus making it very tedious. Yesterday three more witnesses were examined, and at 4 o'clock the attorney for the defense announced that he wanted to prove that the ordinance was illegal because only two of the councilmen voted for it, and the case was adjourned till this morning. Matters often grow very warm in the courtroom and the judge has his hands full. While the case was being tried yesterday Mr. Copeland, one of the saloon men who had been arrested, stood gazing very intently at the City Attorney, when the attorney called the judge's attention to the fact that he was being insulted. "I did not know it was possible to insult you," botly answered Copeland, when the judge cooled matters down. At another time Westerman said water was a liquor and defendant could be prosecuted under the ordinance for giving away water. "Water isn't a liquor," said the City Attorney. "I'll bet you a hundred dollars it is," said Westerman, hotly. "Have you got a hundred dollars!" asked the City Attorney. Here the judge stopped all further proceedings.

SANTA BARBARA COUNTY.

Arrival of the Eastern Fruit and Produce Dealers.

Received by the City Officials and Prominent Citizens—Favorably Impressed with Southern California— General News Notes.

[Branch office, No. 713 State street, where news, advertisements and orders for The Times are received.]

The Eastern fruit and produce dealers have arrived and Santa Barbara is doing her best to entertain them. They will see the famous strip of land that lies along the coast and they will believe it is the grandest lay of country they have ever seen. Their impression of Southern California is most dattering. In the very midst of winter, coming right out of the snow and bitter.cold, they arrived and found that the sun shone brightly, the gentle sea breeze from the ocean cooling the atmosphere, the hills verdant with luxuriant native grasses, sweet-scented roses in full bloom, violets pinks and pansies, and the spring crops

sweet-scented roses in full bloom, violets, pinks and pansies, and the spring crops already greeting the farmers.

The excursionists arrived on their expected train at 12:30 and were taken to the Arlington Hotel, where they were received by Mr. Wheeler, the proprietor, and by the mayor and councilmen. The citizens, after lunch, were out with their handsome carriages to drive the visitors over the country. Several of the party were interviewed by The Times reporter, and they have nothing but glowing terms for Southern California. After a sumptuous dinner at the Arlington they pulled out, leaving here at 8 p.m. One of the excursionists said: "I have only a few hours to remain, but I shall see all that I can while I am here. One thing I want is to purchase a carload of your famous lima beans. Southern California is a great country, and the sooner the Eastern people realize its wealth and prosperity the better for them. We have read a great deal of Southern California, but we have found more wealth, richer soil and better climate than we could have realized merely from reading."

SANTA ANA.

[Branch office at Briggs' news stand, conner Fourth and West streets, where subscriptions and advertisements are taken.] The report of City Engineer Finley t

the city trustees Monday night on the ne-cessity, benefits and probable cost of an outfall sewer system for Santa Ana will be a pleasant surprise to many of our city's residents so far as the report treats of the probable cost of the system. The general supposition has been that it would require from \$75,000 to \$125,000 to put in a sewer system that would answer all necessary requirements of the city. Mr. Finley makes the statement that an ample system may be put in at a cost of from \$29,200 to \$70,600, the difference in the cost being in the quality of the material used and the distance to the terminating point—in tide water at a distance of seven and one-half miles, or a sewer farm at less than half that distance. The estimate of \$70,600 is for the total cost of a complete system that will do service for a population of 31,250 people, the mains to be eighteen-inch clay pipe and the terminus in tide water at the head of Newport Bay. The same material used in a system terminating on a sewer farm and including the cost of the farm is estimated to cost \$38,700. A sixtéen-inch cement pipe system that would do service of the farm is estimated to cost \$38,700. estimated to cost \$38,700. A sixtéen-inch cement pipe system that would do service for a population of 20,000 people and terminating in tide water, and is estimated to cost \$50,000, the same system terminating on the sewer farm, \$29,200. The above figures are below the amount that has been considered necessary to put the matter through, and if, after a further investigation, it is ascertained that the system may be made efficient at not much greater expense than that already given, the trustees will no doubt instruct the engineer to draft plans of the system and order an election for the voting of sewer bonds. Santa Ana is now on the main line, and, if it does not switch off on some sidetrack, will eventually gain great

The passing of ordinance No. 143 by the city trustees Monday night does away with two city offices, that of assessor and tax two city offices, that of assessor and tax collector. The work, the board claims, comes under that of the county assessor and tax collector, and they are desirous that the work be done by them hereafter. J. G. Scarborough appeared before the trustees before final action was taken, as attorney for City Assessor Marquis, and gave due notice that claims would be made for the assessor's salary, as usual, if the ordinance was passed.

THE NEW SPRINKLERS.

A Novel Street Parade Yesterday-In-

genious Device.
Los Angeles was treated to a novel display yesterday in a parade of the new street sprinkling force. The column was headed by a band and led by a carriage containing J. M. Studebaker, of Studebaker Bros. Company of South Bend; Ind., S. W. Luitweiler, the local representative, and Capt. A. P. Cross, of the Street Sprinkling Company. Then followed nineteen sprinkling carts of various sizes and descriptions. The column passed down Main and Spring streets to Third, to Broadway, past the City Hall, where it was re-viewed by the city authorities, thence

viewed by the city authorities, thence to First and up Spring street.

Those who witnessed the spectacle are ready to concede that Los Angeles has now one of the best street sprinkling equipments to be found in the United States. This same kind of apparatus has recently been introduced in New York, Brooklyn, Chicago and St. Louis. This city enjoys the honor of being fifth on the list. The sprinkler, which is the invention of J. M. Studebaker, is a most ingenious device. The water is ejected in a spray through two brass valves fixed at the rear of the tank, and supplied by hose connected therewith. By a simple system of levers, operated by pedals at the driver's feet, the water may be turned on or off at will, and the discharge may be regulated to furnish a light, a medium or a heavy spray, according to the street to heavy spray, according to the street to be sprinkled. Another handy arrange-ment is a sliding sleeve which cuts of the spray at the sides of the vehicle to the spray at the sides of the vehicle to avoid wetting a pedestrian or a passing vehicle. Within this arrangement the sprinkling is under the most perfect control. The sprinklers are manufactured by Studebaker Bros.' Company of South Bend, Ind. The largest sprinklers carry a tank made like a section of steam boiler of No. 10 steel, riveted. This is mounted on a heavy truck, the whole weighing 7000 pounds when charged with water. The cart alone weighs 4000 pounds. A medium-sized sprinkler consists of a Russia iron tank, mounted vertically on trucks and having came in from the East on the Southern-Pacific yesterday, and is now standing at the San Fernando street depot. mounted vertically on trucks and having nozzles of Russia iron. Street Fight.

Yesterday afternoon about 1 o'clock a couple of men got into a fight on First street, near Spring, and, after a few "passes," one of them, a rather small man, struck the other, who was much man, struck the other, who was much larger, in the nose, making the blood fly, when he suddenly disappeared. Officers Hill and Leverich were on the scene in a few seconds, but could not find the man who did the hitting. No arrests were made. A crowd of 800 or 400 people gathered in a few minutes, but no one could give any information about the fight.
